

Facebook forritun

- <http://developers.facebook.com/> - síðan sem best er að byrja á
- Hér er takki: “Building an app is easy” – Start Now
- Þarf að bæta við Facebook Developer app forritinu (<http://www.facebook.com/developers>)
- Í Developer app-inu má búa til ný facebook forrit ásamt því heldur það utan um önnur forrit notandans – Set Up New Application
- Mælum með Documentation Wiki síðunni <http://wiki.developers.facebook.com/>

Quick Creation Guide For 'Sky-App'

Follow the simple steps below to create a working skeleton for your Application.

Step 1: Download Facebook's PHP Library

Extract this archive into a directory on your hosting server where you can host and run PHP code (let's call this directory MY_DIR):

```
$ wget 'http://developers.facebook.com/clientlibs/facebook-pla
$ tar -xzf facebook-platform.tar.gz
$ cp facebook-platform/client/facebook*.php MY_DIR
```

Step 2: Create An 'index.php' File

It should look like this, and should also go into MY_DIR:

```
<?php
// Copyright 2007 Facebook Corp. All Rights Reserved.
//
// Application: Sky-App
// File: 'index.php'
// This is a sample skeleton for your application.
//
require_once 'facebook.php';
$appapikey = '0201ca423cca079fdfe1c427a70ee4ba';
$appsecret = '9b1a884147dfa7dd999d9edff41f369f';
$facebook = new Facebook($appapikey, $appsecret);
$user_id = $facebook->require_login();
// Greet the currently logged-in user!
echo "<p>Hello, <fb:name uid=\"\$user_id\" useyou=\"false\" />";
// Print out at most 25 of the logged-in user's friends,
// using the friends.get API method
echo "<p>Friends:";
$friends = $facebook->api_client->friends_get();
$friends = array_slice($friends, 0, 25);
foreach ($friends as $friend) {
    echo "<br>$friend";
}
echo "</p>";
```

Step 3: Test Your Application

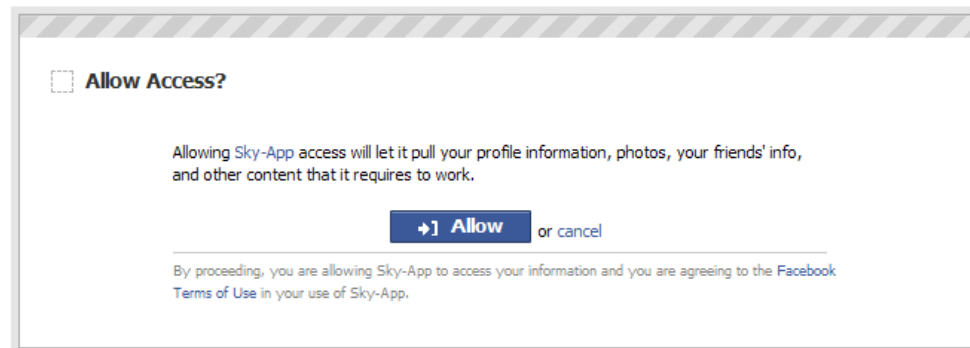

You're almost done!

Head over to your Canvas Page URL to test your application:
<http://apps.facebook.com/sky-app/>

Done

Notum php til að byrja með

- Nú skal downloada <http://developers.facebook.com/clientlibs/facebook-platform.tar.gz>
- Nú þarf bara að vera með php vefþjón
- Setjum forritið og facebook platform kóðan undir sky-app möppuna á localhost
- <http://apps.facebook.com/sky-app>

Komið!

Hello, Sigmar Stefansson!

Friends:

- Vegna þess að við völdum FBML síðu, getum við notað tög eins og fb:profile-pic
- `<fb:profile-pic uid=\"$user_id\" />` og við fáum mynd af notandanum
- Skoðið <http://wiki.developers.facebook.com/index.php/FBML>
- Og <http://wiki.developers.facebook.com/index.php/API>

Aukaefni

- Hægt að gera Facebook Desktop application líka, það þarf bara secret til að loggað sig inn
- Til að fá aðgang að upplýsingum um notanda forritsins þarf að kalla á \$facebook->require_login().
- Notandinn þarf að samþykkja þennan aðgang þegar hann bætir við forritinu
- Samskipti fara fram í gegnum <http://api.facebook.com/restserver.php>
- Restserverinn svarar fyrirspurnum t.d. með xml

Íslendingabók á facebook

- Mjög einfalt php script notar ættrækningar forrit sem til var fyrir í Íslenskri erfðagreiningu
- Notar nöfn og afmælisdaga, finnur skildleika við facebook vini

 <p>Úlfar Sigmarsson Sigmar Kristinsson (1909-1978) Guðlaug Elín Úlfarsdóttir (1918-2002)</p>	2	 <p>Arnar Kári Hallgrímsson Guðlaug Elín Úlfarsdóttir (1918-2002)</p>	2
 <p>Gudrun K Runarsdóttir Sigmar Kristinsson (1909-1978) Guðlaug Elín Úlfarsdóttir (1918-2002)</p>	2	 <p>Garðar Páll Gíslason Eyjólfur Oddsson (1789-1853) Guðrún Sæmundsdóttir (1794)</p>	5
 <p>Einar Guðberg Jónsson Vigdís Þorleifsdóttir (1776-1825)</p>	5	 <p>Asgeir Orn Hlodversson Þórður Arason (1758-1831)</p>	6
 <p>Salka Hauksdóttir Pétur Pétursson (1763) Mekín Bjarnadóttir (1762)</p>	6	 <p>Daniel Scheving Jón Jónsson (1756-1832)</p>	6

Fylgjast með notkun

- Eigendur forritsins geta fylgst með notkun
- Neðst á síðu forristins er hægt að
- nálgast upplýsingasíðu þess

 Built by Íslendingabók [Contact](#) [Report](#)

- Með share takkanum er hægt að
- dreifa forritinu til vina og fleiri
