

Perspective: Infrastructure as a Service (IaaS)

- Give us a machine, we will go from there.
- We usually don't care about the OS, as long as it is sane.
- Sometimes we skip all the way to SaaS
- Kube keeps you sane and away from perceived vendor lock
- Why would you go insane?

Clouds are also magic silver bullets!

- Nope
- “Private”
- VPNs
- OAuth2/SAML/OpenID/MyFancyNewAuthThing
- Client cert verification

Using IaaS to escape technical debt

- Containerization
- Orchestration
- Sort of...

Using SaaS to escape from technical debt

- CDNs
 - No really, I'm sad this is a bullet point
- Message Queues/PubSub
- Key Value Stores
