Mint Solutions

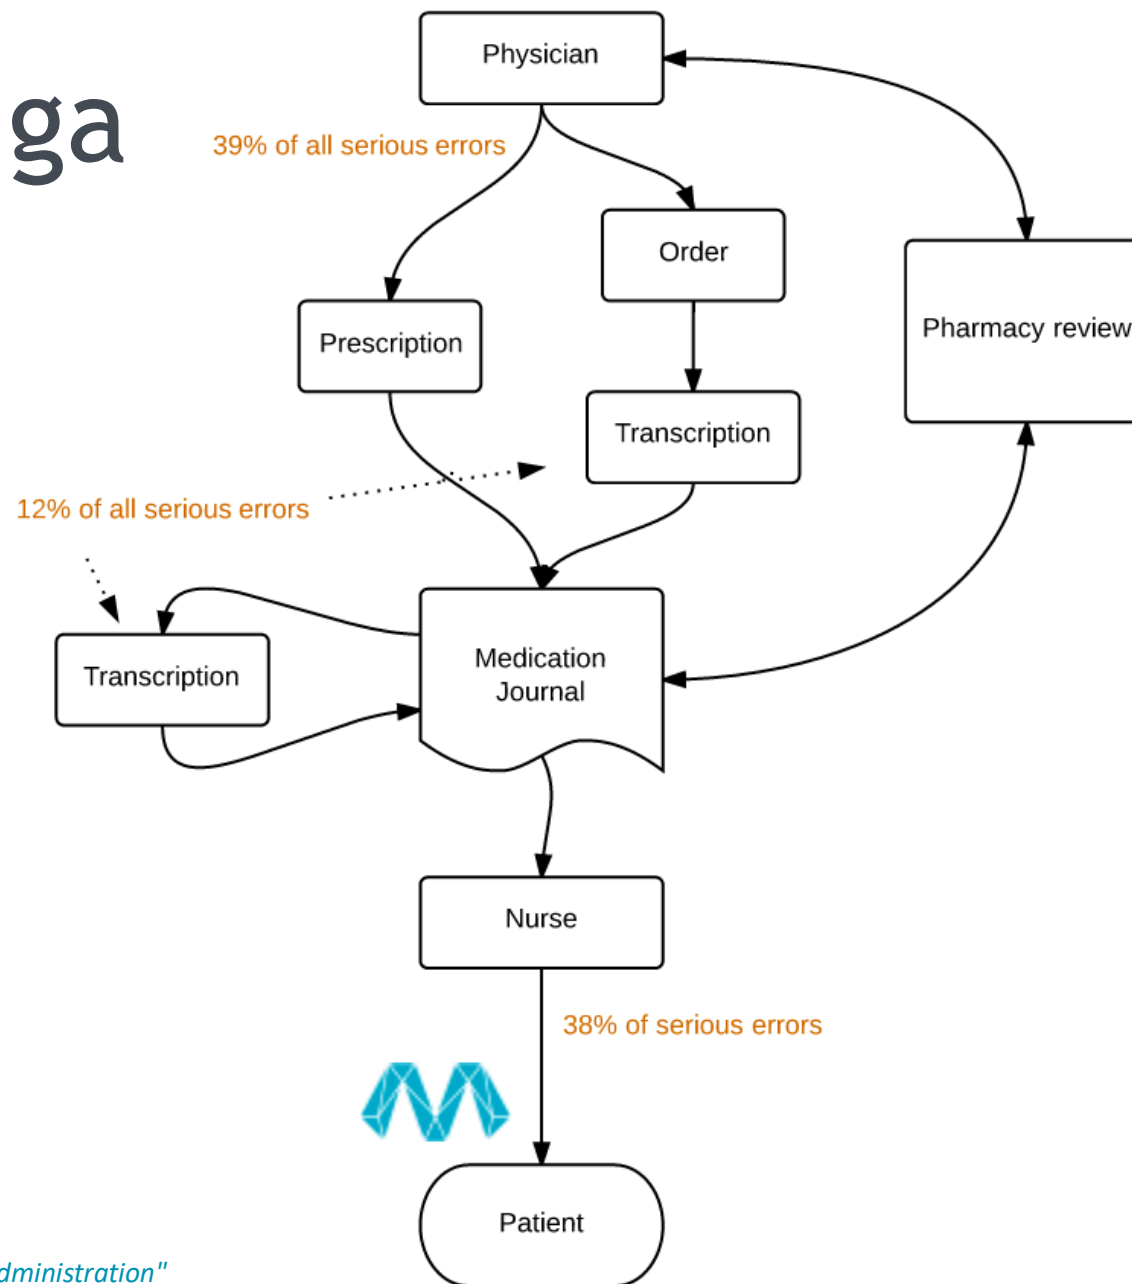

“Medication errors are the most common mistakes in hospitals, contributing to an estimated 7,000 deaths annually.” (USA)

“Research has suggested that, on average, one medication error occurs per patient per day.”

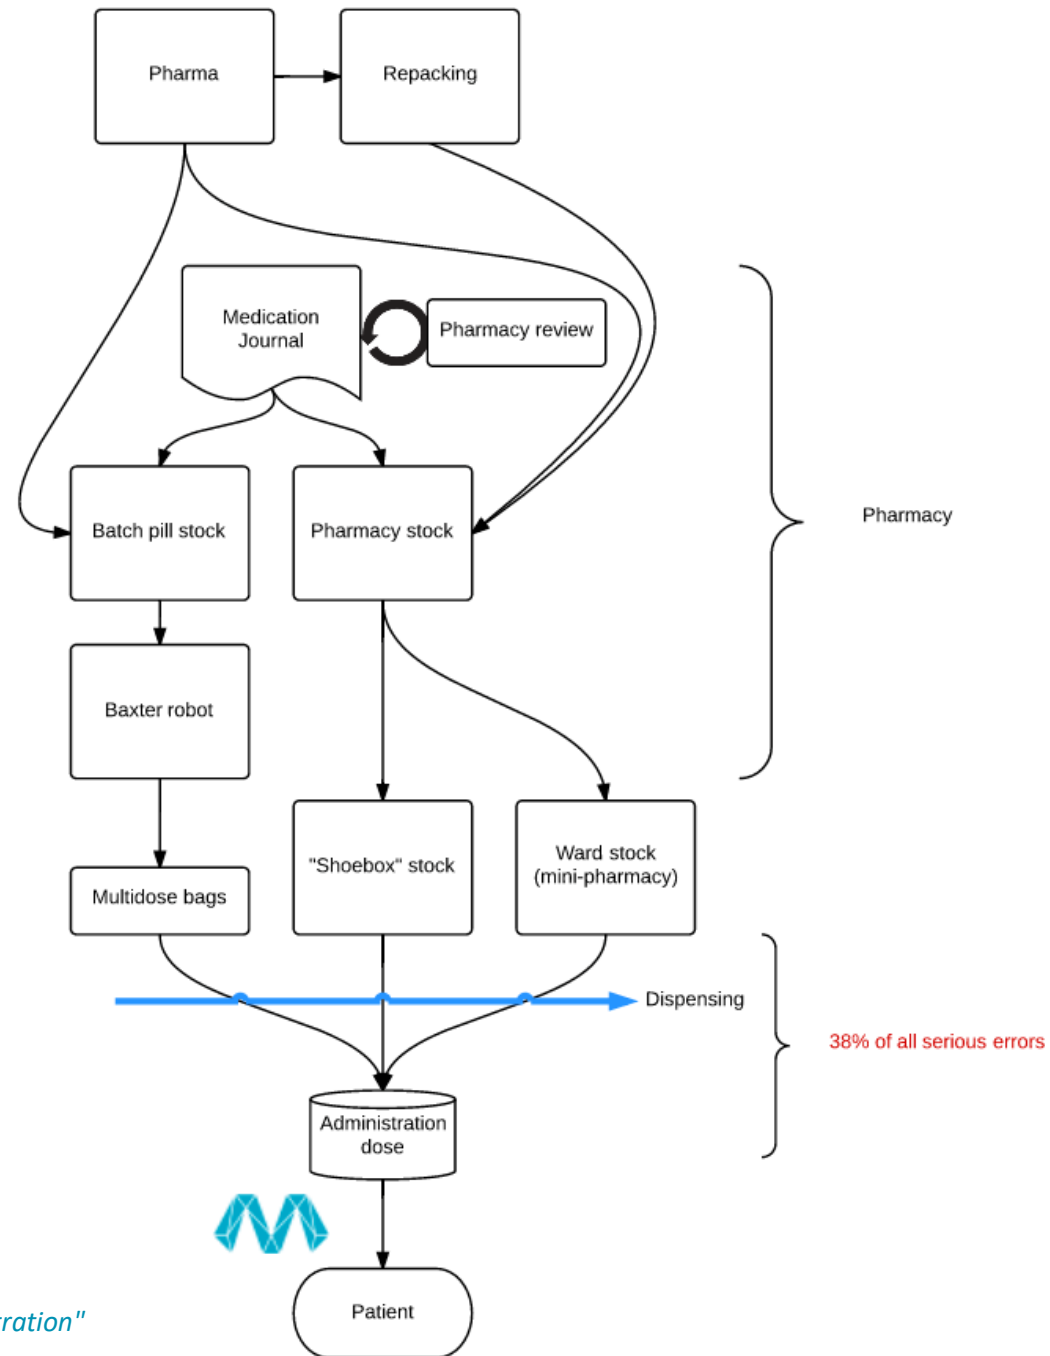

Verkferlar með lyf eru flóknir

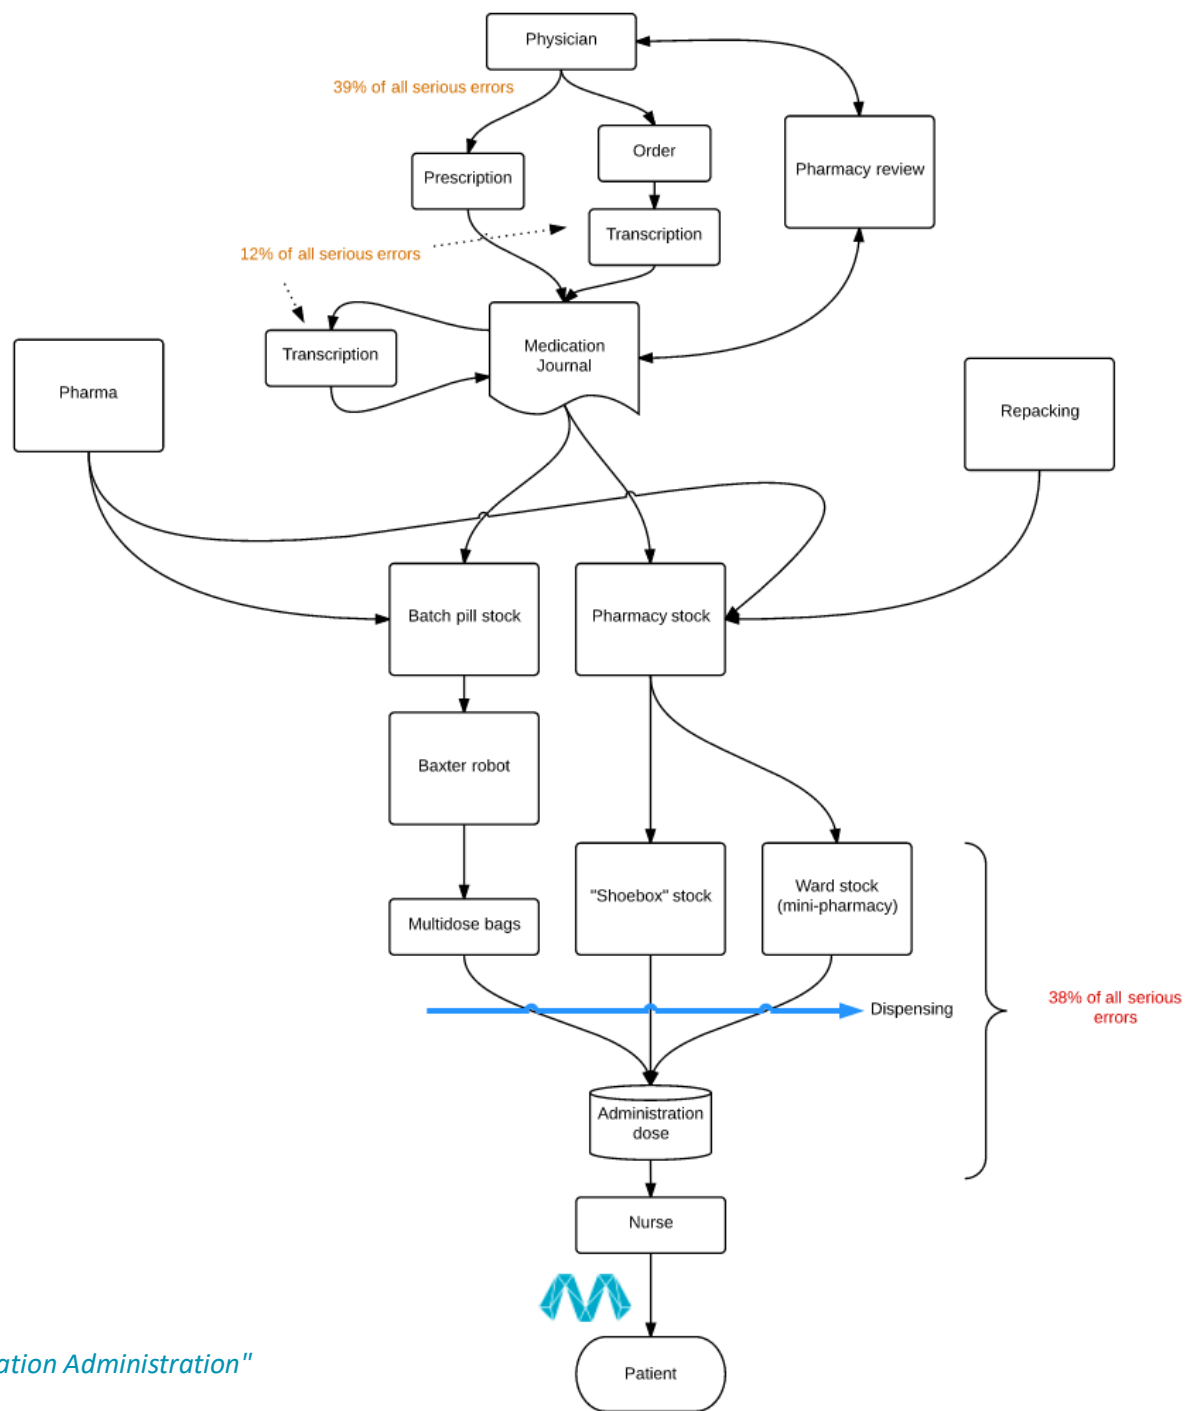

Flæði upplýsinga

Flæði lyfja

- Hjúkrunarfræðingar eru síðasta vörn sjúklings gegn mistökum
- Treystum á þá til að leiðrétta öll mistök sem gerast í keðjunni
- Hafa engin almennileg tól til hjálpa

8,2 million patient beds in Europe and US

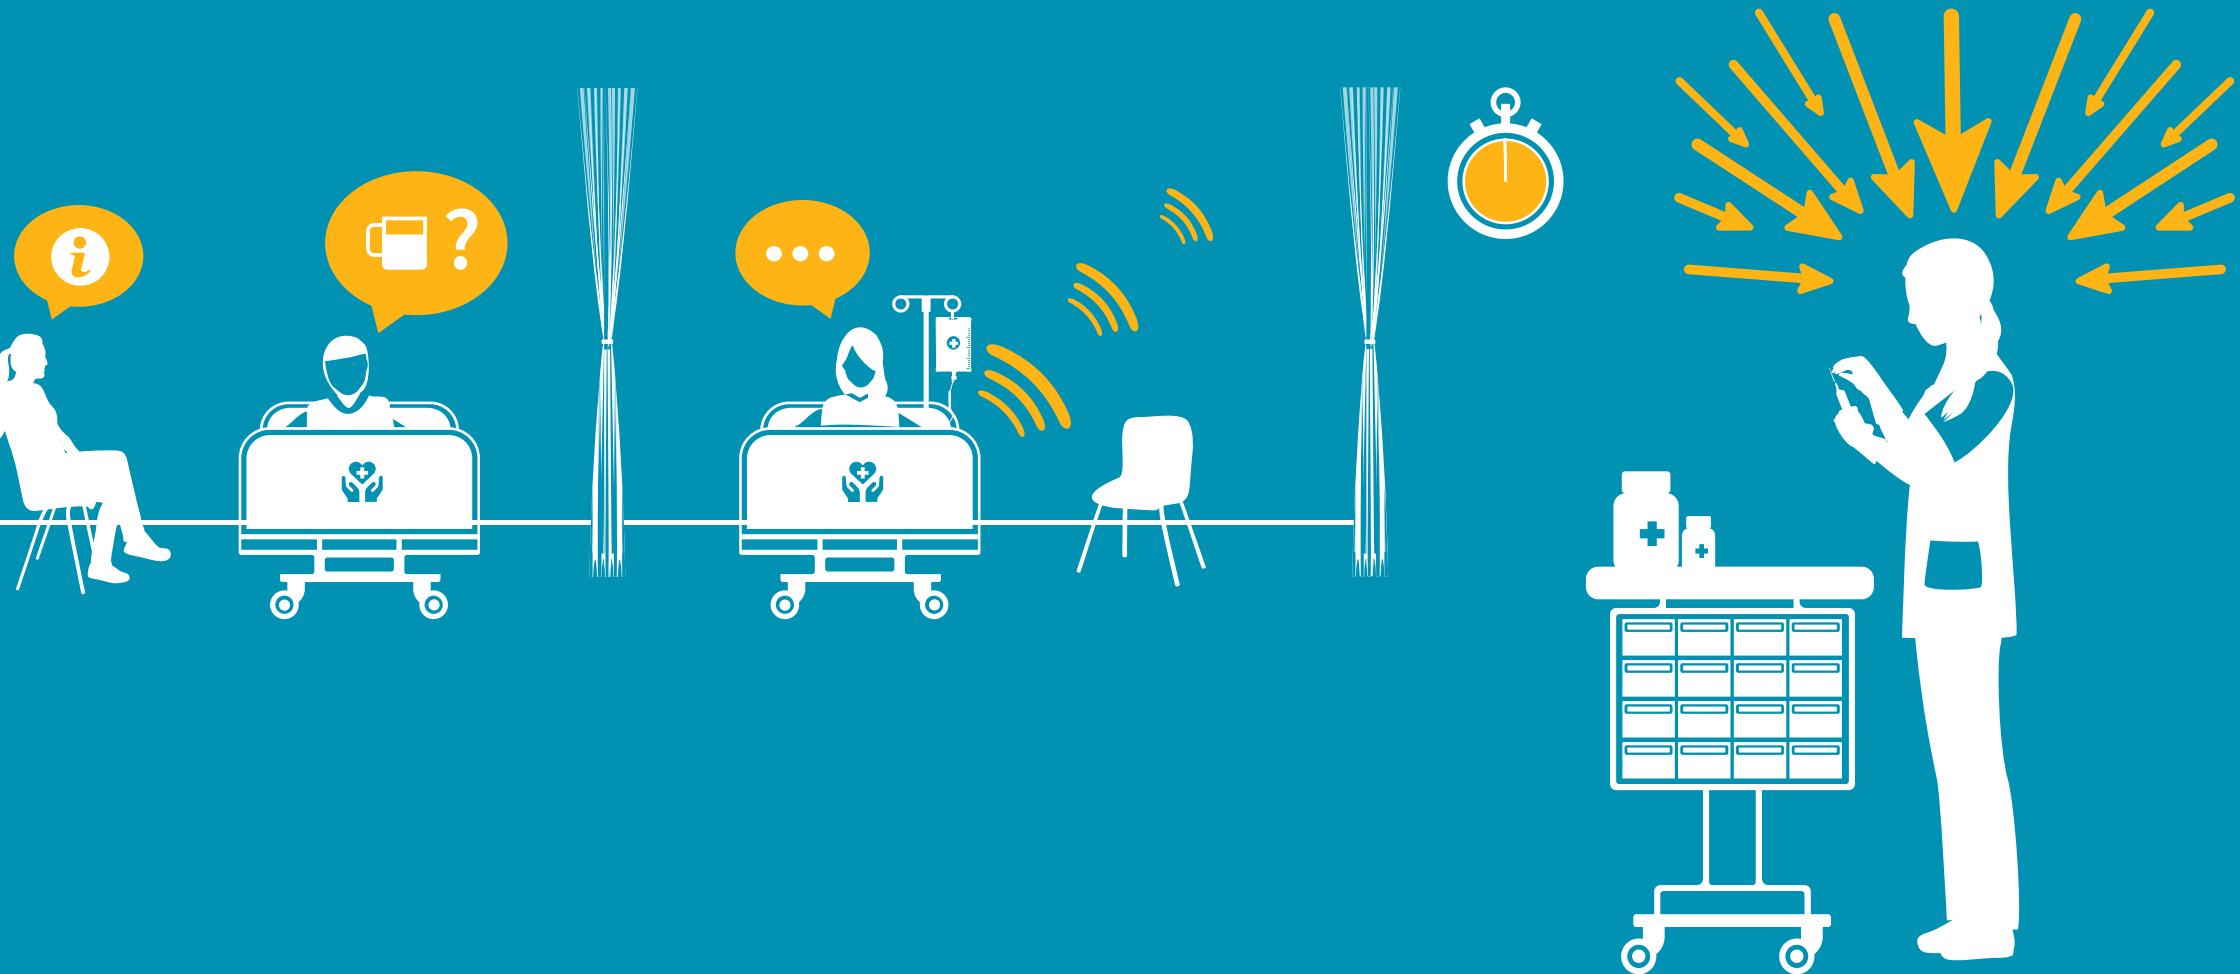

= 65 million medication dosages per day

Án sjálfvirks eftirlits við lyfjagjöf eru allt að 20% lyfjagjafa rangt framkvæmdar

Vinnuumhverfi hjúkrunarfræðinga...

Black holes stand at the very edge of scientific theory. Most scientists believe they exist, although many of their theories break down under the extreme conditions within. But Professor Cornelius Van Bockstein of the University of Ushuaia says he knows what you find inside, and challenges the traditional idea that gravity would cause you death by “spaghettification”.

lyfjagjöfum eru rangt framkvæmdar

CHLORPROPAMIDE
100 mg TABLET

N5107920201

Lot 0B207 Exp. 2/02
PKG. BY: UDL, ROCKFORD, IL

CHLORPROMAZINE HCl
100 mg TABLET

N5107951601

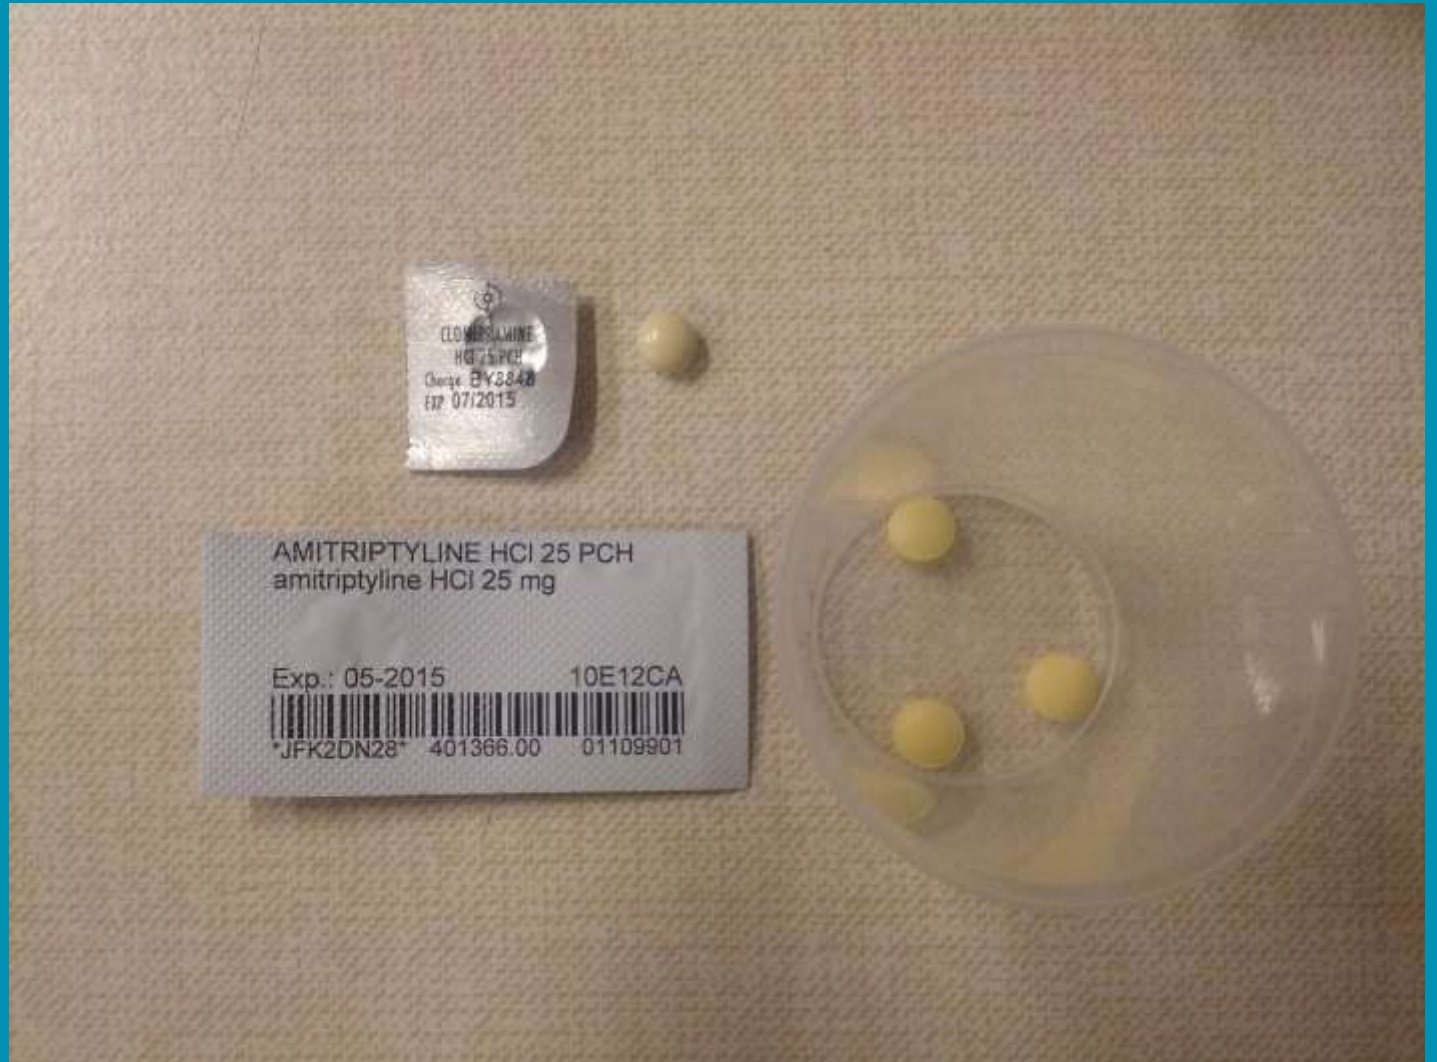

Lot 0D737 Exp. 11/01
PKG. BY: UDL, ROCKFORD, IL

c. ISMP; used w/ permission

Clomipramine v.s. Amitriptyline

Clomipramine til sem
Anafranil

Lykilatriði að rétt lyf berist til hjúkrunarfræðings

- Sjálfvirk lyfjatiltínsla í apótekum
 - Unitdose
 - Multidose
- Sérhæft starfsfólk í lyfjatiltínslu
- Sjálfvirkir lyfjaskápar á deildum

- “... 52% increase in I.V. mini-bag errors occurred after [barcode] implementation in the ICUs”
- “total medication errors were not affected by [barcode] implementation”
- “the potential for [barcode] to prevent errors is diminished if nursing workflow is not considered in the implementation”
