AI SERVICES

Easily add intelligence to applications

No machine learning skills required

AWS pre-trained AI Services provide ready-made intelligence for your applications and workflows. AI Services easily integrate with your applications to address common use cases such as personalized recommendations, modernizing your contact center, improving safety and security, and increasing customer engagement. Because we use the same deep learning technology that powers Amazon.com and our ML Services, you get quality and accuracy from continuously-learning APIs. And best of all, AI Services on AWS don't require machine learning experience.

Recommendations

Personalize experiences for your customers with the same recommendation technology used at Amazon.com.

AMAZON PERSONALIZE »

Forecasting

Build accurate forecasting models based on the same machine learning forecasting technology used by Amazon.com.

AMAZON FORECAST »

Image and Video Analysis

Add image and video analysis to your applications to catalog assets, automate media workflows, and extract meaning.

AMAZON REKOGNITION »

Advanced Text Analytics

Use natural language processing to extract insights and relationships from unstructured text.

AMAZON COMPREHEND »

Document Analysis

Automatically extract text and data from millions of documents in just hours, reducing manual efforts.

AMAZON TEXTRACT »

Voice

Turn text into lifelike speech to give voice to your applications.

AMAZON POLLY »

Conversational Agents

Easily build conversational agents to improve customer service and increase contact center efficiency.

AMAZON LEX »

Translation

Expand your reach through efficient and cost-effective translation to reach audiences in multiple languages.

AMAZON TRANSLATE »

Transcription

Easily add high-quality speech-to-text capabilities to your applications and workflows.
